

Contemporary Wedding photography for your special day

To choose a wedding photographer that will be sensitive to your day and provide lasting images is a big decision. I aim to create a record to capture the moods and memories, the laughter and joy.

I feel it's important that you and your guests are relaxed when being photographed so my aim is to be unobtrusive to capture the candid moments whilst also recording the formal groups.

RCP

fun • relaxing • imaginative • memories • professional

Contemporary Wedding photography for your special day

RCP

The photographs

The planning will begin with us meeting to enable me to understand your wishes and to discuss the style. From a formal style through to reportage and informal moments provide a range of opportunities and the style has to be totally comfortable for you.

My objective is to capture everything from the groom, best man and bridesmaids to get some shots of the last minute jitters & excitement, the guests and you arriving at the ceremony, the cake cutting at the reception through to your wedding breakfast. If you wish I am pleased to capture from earlier in your day with the wedding preparations capturing all the fun and preparation for the day ahead through to your first dance.

The photographs will be presented to you in a preview book or wedding box of your choice which is yours to keep. You will select those photographs you wish to form your wedding album.

The presentation of our albums is of a standard that is, like the photography, of the highest level. I have a variety of sizes and styles in all our albums, including reportage, classic and contemporary. Each one will be created to your own taste and individuality.

Memorable moments captured.
